

DERMALUX IS THE BEST!

- Dermalux is one of the original LED Phototherapy manufacturers in the global market
- We are recognised as a world leading, premium British brand for LED Phototherapy
- Dermalux is a multi-award winning treatment: Five times winner of Best Treatment at the UK Aesthetic Awards and Best UK Manufacturer 2019
- Our devices are used by Doctors, Dermatologists and Skin Care professionals across the world
- We specialise in LED Phototherapy and we are supported by a team of industry experts to ensure we remain at the forefront of research, technology and clinical knowledge
- Dermalux developed the unique Tri-Wave technology to ensure we deliver powerful and consistent multi-wavelength treatments
- The Dermalux systems are designed, developed and manufactured in the UK at our facility in Warrington, Cheshire
- We are an ISO13485 Medical Device manufacturer. This ensures the Dermalux systems comply with global regulations as well as demonstrating a commitment to safety and quality
- Our LED technology is next generation and proprietary to Dermalux
- Our systems are fully CE certified in line with the new Medical Device Regulations (MDR)
- Our Tri-Wave MD and Flex MD are the only LED Phototherapy systems in the world to be medically certified for the treatment of Psoriasis
- We use only the most clinically evidenced wavelengths for LED Phototherapy: Blue 415nm, Red 633nm and NIR 830nm
- Dermalux Blue light at 415nm is 10 times more effective (more absorbed) than 450nm to 470nm as used by many other LED devices
- We deliver quick, safe, proven and consistent results across a wide range of indications
- The design of the Dermalux LED canopy is hygienic and helps to minimise cross contamination
- We are committed to the ongoing development, education and support of all our clients
